HOW TO CURE YOUR COLD

The half or more of the people of St. Joseph suffering with had colds should be aware of the fact that curing a cold is really a very simple matterone might say it was elemental.

In the first place go home and go to bed. Cover yourself up warmly, and be sure that there is proper ven-

tilistion, assuring plenty of fresh air. Then call in all your friends and ask them to give their advice as to the next step to be taken. Also invite them to send their friends to give further advice.

Before they have concluded you will not be bothered by the cold.

The people of the United States
